BCIA Congratulates Brenda K. Wiederhold, Brussels, Psychologist, of the Achievement of Senior Fellow Advanced Board Certification in Neurofeedback

Wheat Ridge, CO – The Biofeedback Certification International Alliance, formerly the Biofeedback Certification Institute of America (BCIA), is pleased to announce that Brenda Wiederhold has gained a higher level of progressive certification in neurofeedback. Professor Wiederhold joins an elite group of professionals who have met an advanced level of continuing education and experience required in order to maintain their credential as a certified provider of neurofeedback services.

Professor Wiederhold, of Brussels, Belgium and San Diego, California has a practice that uses virtual reality exposure therapy in combination with physiological monitoring and feedback to treat stress related disorders.

Board certification demonstrates professionalism and adherence to carefully developed standards as a health care provider. Procedures are consistent with the Department of Health & Human Services Guidelines, giving credibility and evidence that practitioners maintain knowledge and skill levels. Health care professionals who achieve BCIA Certification demonstrate commitment to professionalism by completing basic degree and educational requirements, endorsing a rigorous code of professional conduct, learning to apply clinical neurofeedback skills during mentorship, and passing a written examination.

The Biofeedback Certification International Alliance (BCIA) is the only institute recognized worldwide that grants certification to biofeedback practitioners. The Association for Applied Psychophysiology and Biofeedback (AAPB), the Biofeedback Foundation of Europe (BFE), and the International Society for Neurofeedback and Research (ISNR) all endorse BCIA certification. BCIA was established in 1981 to certify individuals who meet education and training standards in biofeedback and to progressively recertify those who advance their knowledge through continuing education. Currently, more than 1,600 healthcare professionals have achieved this certification in 25 countries.
